## PROFESSIONAL SUMMARY

Senior Full Stack, AI & Infrastructure Engineer with 10+ years of experience building scalable SaaS, fintech, AI-powered, and enterprise platforms across web, mobile, and cloud environments. Expert in React, Next.js, Node.js, Python, PostgreSQL, AWS, and LLM integrations, with strong experience leading end-to-end product delivery, multi-tenant architectures, API ecosystems, and AI automation systems.

Founder and technical lead behind platforms including FlexiCoop, Scavenge, Fivage, and multiple AI-powered applications serving real users in finance, ecommerce, education, and enterprise operations. Former CCNP-certified network professional with hands-on infrastructure, networking, and systems deployment experience.

---

## CORE TECHNICAL SKILLS

Frontend

React, Next.js, TypeScript, React Native (Expo), TailwindCSS, MUI, Ant Design

## **Backend**

Node.js, Express.js, NestJS, Python, Flask, FastAPI, Django, Sequelize, Prisma

## **AI & LLM Systems**

LangChain, OpenAI API, RAG Pipelines, ChromaDB, Vector Search, Prompt Engineering, NLP, RLHF

## **Databases**

PostgreSQL, MySQL, MongoDB, Redis

## **Cloud & DevOps**

AWS (EC2, Lambda, RDS, S3), Azure, Docker, Nginx, CI/CD, GitHub Actions, GitLab

## **Infrastructure & Networking**

Cisco Routing & Switching, VLAN Configuration, Network Security, LAN/WAN Deployment, Systems Administration

## **Testing & Tools**

Jest, Mocha, Git, Jira, Trello, Figma, Postman

---

# **PROFESSIONAL EXPERIENCE**

## **Michofat Konsult Limited**

### **Senior Software Engineer / Technical Lead**

Jan 2024 – Present | Lagos, Nigeria

- Led development of enterprise SaaS, fintech, ecommerce, AI, and mobile applications across multiple industries.
- Managed architecture decisions, backend systems, cloud deployments, API integrations, and product delivery workflows.
- Coordinated frontend, backend, and mobile engineering efforts across multiple client and internal products.
- Participated in enterprise infrastructure and networking deployments including VLAN configuration, routing/switching, network security, and systems integration.

## **Key Projects**

### **FlexiCoop – Multi-Tenant Fintech SaaS**

- Built a cooperative management platform serving 30+ organizations with loans, savings, receivables, accounting workflows, approvals, notifications, and role-based dashboards.
- Developed customer mobile and web applications using React Native, React, Node.js, PostgreSQL, and cloud infrastructure.

### **Scavenge – Ecommerce Marketplace**

- Developed a full ecommerce ecosystem with payment integration, realtime notifications, messaging, inventory workflows, and mobile apps.
- Implemented backend APIs, order systems, wallet flows, and cloud storage infrastructure.

### **Fivage – Cloud Storage SaaS**

- Built scalable storage infrastructure with Paystack billing integration, API key provisioning, file management, and secure authentication systems.

### **CoralQuest – Streaming Platform**

- Developed a streaming and media platform using Next.js, Prisma, PostgreSQL, and SEO-optimized content routing.

### **IntelliTest – AI Assessment Platform**

- Built an AI-powered assessment platform using React, NestJS, PostgreSQL,

LangChain, and OpenAI workflows for automated evaluation and scoring.

#### **Voice-Enabled AI Copilot**

- Developed a conversational RAG assistant using Flask, LangChain, ChromaDB, OpenAI, and ElevenLabs with voice-enabled avatar interaction and intelligent retrieval systems.

#### **Embassy Family, NPC HURIS, DWSuch & Mobile Apps**

- Built and maintained multiple production React Native (Expo) mobile applications with realtime APIs, authentication systems, offline handling, push notifications, and cloud integrations.
- 

## **Turing**

#### **LLM Trainer**

Nov 2024 – Apr 2025 | Remote

- Trained and evaluated LLM systems through prompt engineering, multi-turn conversations, RLHF workflows, and structured data generation.
  - Designed task pipelines for function calling, tool usage, and conversational AI evaluation.
- 

## **Mahshell Soft**

#### **Frontend Team Lead – Bluecounts Project**

Mar 2025 – May 2025 | Remote

- Led frontend engineering for a business management platform covering POS, inventory, invoicing, and reporting systems.
- Managed React/TypeScript architecture, Azure DevOps workflows, Git strategy,

and deployment pipelines.

---

## **LogaXP**

### **Lead Software Engineer**

Aug 2024 – Jan 2025 | Tennessee, USA

- Led development of AI-powered HRIS and evaluation systems using React, Node.js, and NLP tooling.
  - Directed backend architecture, CI/CD processes, code reviews, and production deployments.
- 

## **Sales Agency**

### **Senior Full Stack Developer (Contract)**

Aug 2023 – Dec 2023 | Florida, USA

- Built and maintained multiple full-stack platforms including advanced email campaign systems using React Flow.
  - Developed suppression and blacklist tooling processing millions of email records and hashed datasets.
  - Implemented backend APIs, campaign automation systems, and reporting infrastructure.
- 

## **Yaba College of Technology**

### **Assistant Chief Program Analyst / Head of Software Engineering (Webometrics)**

2009 – 2023 | Lagos, Nigeria

- Spearheaded development of 15+ educational, HR, and enterprise systems improving operational efficiency and revenue generation.
  - Led Webometrics initiatives that ranked Yabatech #1 in Nigeria for five consecutive years.
  - Built staff portals, ID verification systems, SEO platforms, and institutional mobile applications.
  - Managed and secured college-wide network infrastructure and enterprise systems deployments.
- 

## **Amclint Solutions**

### **Software Developer (Part-Time)**

2015 – 2017

- Developed CBT and educational systems serving over 15,000 students.
  - Built analytics dashboards and mobile/web learning systems.
- 

## **EDUCATION**

### **MSc. Communication Systems Engineering**

University of Ibadan | 2015 – 2017

**Research:** Improving the Spectral Efficiency of 4G LTE Towards Fulfillment of 5G Mobile Communication Technology Requirements.

---

## **BTech. Electronic/Electrical Engineering**

Ladoke Akintola University of Technology | 2002 – 2007

**Research:** Design and implementation of a 1.8m diameter C-Band satellite dish for free-to-air television access.

---

## **CERTIFICATIONS**

- Cisco Certified Network Professional (CCNP)
  - Cisco Certified Network Associate (CCNA)
  - Fundamentals of Digital Marketing
- 

## **CORE STRENGTHS**

- Full Stack Engineering
- AI & LLM Systems
- SaaS Architecture
- Fintech Platforms
- Enterprise Infrastructure
- Cloud & DevOps
- Product Leadership
- API Integrations
- Team Leadership
- Agile Delivery
- Problem Solving
- Technical Mentorship
